Founded in 1877

International journal for structural, physical,
and chemical aspects of crystalline materials

The Journal

Zeitschrift für
Kristallographie
Crystalline Materials

ISSN: 0044-2968
12 issues per year

Zeitschrift für Kristallographie –

Crystalline Materials offers a place for researchers to present results of their crystallographic studies. The journal includes theoretical as well as experimental research. It publishes Original Contributions and Review Articles in manifold areas of crystallography.

Founded in 1877 by Paul von Groth **Zeitschrift für Kristallographie** is one of the world's oldest scientific journals: More than 130 years of successful scientific publishing!

Special Topic Issues

More than 20 topics, as *e.g.*

- Precession Electron Crystallography
- Layered Materials: Structure and Properties
- Hydrogen Storage Materials

Editors

- Evgeny Antipov
Moscow State University, Russia
- Ulrich Bismayer
University Hamburg, Germany
- Yuri Grin
Max Planck Institute for Chemical Physics of Solids, Germany
- J. Manuel Perez-Mato
Universidad del País Vasco, Bilbao, Spain
- Václav Petříček
Academy of Sciences, Praha, Czech Republic
- Rainer Pöttgen
University Münster, Germany
- Wolfgang W. Schmahl
University Munich, Germany
- Edward R. T. Tiekink
University of Malaya, Malaysia
- Xiaodong Zou
University Stockholm, Sweden

Editorial Board

Elena V. Boldyreva, Maria L. Fornasini, Carmelo Giacobozzo, Wolfgang Hönl, Emil Makovicky, Kunio Miki, Eric J. Mittemeijer, Bogdan Palosz, Dhananjai Pandey, René Peschar, Thomas Proffen, Jürgen Schreuer, Hiroyuki Takakura, Björn Winkler and Takamitsu Yamanaka

Sections

- Letters
- Review Articles
- Original Papers
- Discussions

Aims and Scopes

Zeitschrift für Kristallographie presents significant results of theoretical or experimental study on crystallography, such as research

- on structures and on properties of organic/inorganic substances with crystalline character, periodically ordered, modulated or quasicrystalline
- on static and dynamic phenomena applying the various methods of diffraction, spectroscopy and microscopy in the sections, Letters, Review Articles, Original Papers and Discussions

Assets

- Strict refereeing system
- Timely publication
- E-mail alert: Table of Contents
- Monthly appearance
- Print and online version

Zeitschrift für Kristallographie keeps you informed on the latest developments offering everything you expect of a modern journal.

- Current problems in science
- Modern methods of experimental and theoretical research
- Particular emphasis to promising future developments
